FIFA World Cup Match Alpha Model

Transparent local model for statistical alpha estimates. It estimates probabilities, fair odds, scorelines, environmental effects, and alpha EV versus optional market odds. It does not provide staking or investment advice.

Czechia vs Mexico

FIFA World Cup | Group A | 2026-06-25 01:00 UTC | Estadio Azteca

Primary model

Behavior layer

Baseline external-calibration Diagnostic only

The model tested recent historical behavior fairly using only pre-match data. In that strict test, recent behavior did not improve both Brier score and log loss. The main probabilities and alpha tables therefore use external-calibrated team ratings; behavior is shown only as a warning or context signal.

Behavior disagreement: diagnostic only. The behavior layer changes Czechia win probability by -19.3 percentage points, but strict backtesting has not validated behavior as a primary signal. Behavior disagreement: diagnostic only. The behavior layer changes Mexico win probability by +27.5 percentage points, but strict backtesting has not validated behavior as a primary signal.
